

THE-ICE IPoE Forum Poster Paper Submissions

A poster paper is a visual presentation of your research with the objective of stimulating discussion and generating feedback. Poster papers presented at IPoE Forums provide an opportunity to introduce research to scholars, industry professionals and peers, generating networking opportunities, which can enhance existing research and promote further research.

Poster Paper presentations

Poster Paper presentations will be allocated an area to display their paper. Therefore, it is important that poster papers are eye-catching and readable from a distance (approximately 2-3m).

Presenters are responsible for setting up and taking down their presentation materials. In addition, author/s should make themselves available during Forum breaks, in order to discuss their work one-on-one in a creative presentation environment.

The Poster Paper Presentation Session provides delegates the opportunity to present research in visual rather than the traditional oral presentation.

Poster Paper Submission Guidelines

The header on the poster contains the title, the author's name, affiliation(s), and email address and which of the five sub-themes the poster paper fits.

- Abstract maximum of 150 words
- Document format: MS Word
- Be written in English, free from grammatical and spelling errors
- Poster papers may be used to present research proposals or "works in progress"
- Posters should be made of lightweight material
- The presenter will be responsible for setting up and taking down their presentation materials. All set-ups must be completed before the start of the conference
- The poster should be presented in A0 size (TBC)
- The contents of the poster should contain the objective, methods, results (if available) and discussion with illustrations (e.g. figures, tables, charts or graphs), and references along with acknowledgement

Poster papers are to be submitted through EasyChair located on THE-ICE IPoE Forum Call for Papers website.
